Talib Hussain
full-stack website developer

About

Hello I 'm a full-stack web developer and make websites both static and dynamic, specialised in converting Psd/design to html and react pages.

My projects start with the need of the clients and end with their full satisfaction to build trust with them. I ensure to give them quality work what they expect from me to make their time and money worthwhile. I have done remote works with many clients and got positive feedbacks all the time.

EXPERIENCE

- worked in offline company in 2019

- Multiple website projects of local clients including website development with responsive and fluid layout

- worked in freelancing platform like upwok and did remote work with many clients

EXPERTISE

- html page with 100% fluid layout that maintains the size ratio always on changing the size of the window.

- Quality work to make client's time and money worthwhile.

- Project completion on time
